

EDUCATION

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
B.E. (CSE)	VIT Chennai	8.5	2021-2025
Senior Secondary	CBSE Board	88.2%	2021
Secondary	CBSE Board	89.6%	2019

EXPERIENCE

- Sola AI** December 2024 - Present
Remote Founder/Developer
 - Built a Solana voice assistant using TypeScript, Rust, and onchain execution flows.
 - Implemented support to 10+ protocols and 20+ onchain actions, with ongoing additions.
- Orion Innovation** Sep 2023 - Oct 2023
Chennai Software Development Intern
 - Improved AngularJS modules for an Australian football league management system.
 - Built authentication and seat allocation prototypes impacting live ticketing traffic using React and Python
- NFTAlpha** Apr 2022 - Apr 2023
Remote Python Developer
 - Developed cross chain wallet and portfolio tracking pipelines with Discord integration (Python, Hikari).
 - Built automated market data, token analysis, and operations bots used by active crypto communities.
- MindsDB/Rede** 2023
OpenSource Contributor
 - Implemented Shopify data handlers and contributed to Delta Lake integrations in MindsDB.
 - Developed CLI feature extensions for Rede.

PROJECTS

- Sola AI** Live URL | GitHub
 - Tech Stack** : Rust, TypeScript, Next.js, Solana Web3js, Solana-Program, Prisma, Axum
 - Built a voice assistant to execute Solana intents (trading, staking, lending, NFT actions) using on-chain program execution and intent parsing
 - Developed the supporting microservices and program integrations, processing 20+ onchain actions with >90% success rate
- Nexa Toolkit** GitHub
 - Tech Stack**: TypeScript, Next.js, Solana Web3js
 - Built a framework that allows developers to create Solana-based voice assistants by plugging in custom actions and logic.
- StarkDev** Live Url | GitHub
 - Tech Stack**: Rust, Clap
 - Published a CLI tool simplifying StarkNet development environment setup.
- AptNinja** Live Url | GitHub
 - Tech Stack**: Move, JavaScript, React
 - Built a token driven game on Aptos inspired by Fruit Ninja.
 - Added gasless transactions and hit based onchain event triggers.

AREAS OF EXPERTISE

- Languages Known**: Rust, Python, TypeScript, Solidity
- Blockchain Development**: Full stack Development, Smart Contracts, Offchain integrations and Oracles
- Blockchain Stack** Anchor, Solana Web3js, Metaplex cNFTS

ACHIEVEMENTS

- Blockchain Hackathons** 6 wins across Solana, Ethereum and Aptos including multiple 1st-place awards 2023-2025
- Speaker** Delivered technical sessions at a regional Solana events and multiple campus workshops 2024
- StarkDev** Published Rust crate with 3,900+ downloads on crates.io 2024
